

FOG

LIQUID TO CREATE PERMANENT FOG

FEATURES

Structure : Emulsion prepared with pure water and pharmaceutical quality glycols and glycerols.

Outlook : Clear, slightly viscous liquid

Color : Colorless, very light yellowish.

Smoke : Distinctive

Density, g/cm³ : 1,09-1,20

pH : 5,0-7,0

Usage and Properties : It is a water-based liquid produced for machines that produce fog at different intensities through heat. It creates intense permanent fog for specific purpose. It is used in the entertainment industry, fire and flight simulations. Do not mix with other products / liquids.

Packaging and Storage : 5 and 30 L plastic packages. The original packaging should be stored at 5-35 ° C with the lid closed. It should not be exposed to direct sunlight. Shelf life is 2 years.
